

## JOSE ZAMBRANO VELASQUEZ

Full Stack Programmer

I have over **1 year** of experience in the **Omnichannel** area, with knowledge of **OOP** and **FP**. In **Frontend** Development, I am proficient in technologies such as **HTML**, **CSS**, **JavaScript**, **Angular**, and **React frameworks**. For **Backend**, I use **Node.js**, **Express**, **Adonis**, **Nest.js**, along with **MySQL** and **MongoDB databases**. I also have experience with version control using **Git** and utilize **Amazon Web Services** for services like **Cognito**, **Amplify**, and **serverless frameworks**. I am familiar with agile methodologies using tools like **Slack** or **Atlassian**. I am enthusiastic about technology, enjoy continuous learning, and stay updated on new technological trends. Teamwork and easy expression skills.

### Certifications:

Quality Assurance: <https://bit.ly/488am7n>

Back End Development and APIs: <https://bit.ly/3t5npb1>

Data Visualization: <https://bit.ly/488am7n>

Front End Development Libraries: <https://bit.ly/3t9LoFW>

Javascript Algorithms and Data Structures Certification: <https://bit.ly/3GEpddW>

Responsive Web Design Certification: <https://bit.ly/41hUxZB>

### Portfolio:

It's created with a unique style using technologies like Angular and Localize. You can visit it at <https://joseyzambranov.netlify.app/>

### Professional Experience:

[Sinapsis Corp](#)

August 2022 - Present

As a Full Stack Programmer, my role at Sinapsis Corp involves problem identification and resolution on the platform, development and implementation of new features and improvements, continuous exploration of the latest technological trends, active and effective collaboration with diverse teams and functional areas, and the application of agile methodologies for efficient development management.

### Projects:

#### Surco Tennis:

Collaborative project where I was responsible for reservation logic and payment gateway. This solution is built with Node.js, Express, and MySQL: <https://reservas.surcotenis.pe/>

#### Expense Control:

Personal project developed with React, Redux, Node.js, Express, and MongoDB. The purpose is to control expenses in three steps: create a plan, register a user, and enter daily expenses: <https://joseyzambranov.github.io/expense-control/>

### Education:

Instituto Universitario de Tecnologia de Administracion Industrial

Degree Obtained: Superior Technical in Instrumentation.

Universidad Nacional Abierta (UNA)

Systems Engineer: Up to the second semester.
