JOSE ZAMBRANO VELASQUEZ
Full Stack Programmer

I have over **1 year** of experience in the **Omnichannel** area, with knowledge of **OOP** and **FP**. In **Frontend** Development, I am proficient in technologies such as **HTML, CSS, JavaScript, Angular**, and **React frameworks**. For **Backend**, I use **Node.js, Express, Adonis, Nest.js**, along with **MySQL** and **MongoDB databases**. I also have experience with version control using **Git** and utilize **Amazon Web Services** for services like **Cognito, Amplify**, and **serverless frameworks**. I am familiar with agile methodologies using tools like **Slack** or **Atlassian**. I am enthusiastic about technology, enjoy continuous learning, and stay updated on new technological trends. Teamwork and easy expression skills.

Freecodecamp Certifications:
Quality Assurance: https://bit.ly/488am7n
Back End Development and APIs: https://bit.ly/3t5npb1
Data Visualization: https://bit.ly/488am7n
Front End Development Libraries: https://bit.ly/3t9LoFW
Javascript Algorithms and Data Structures Certification: https://bit.ly/3GEpddW
Responsive Web Design Certification: https://bit.ly/41hUxZB

Portfolio: It's created with a unique style using technologies like Angular and Localize. You can visit it at https://joseyzambranov.netlify.app/

Professional Experience:
Sinapsis Corp
August 2022 - Present
As a Full Stack Programmer, my role at Sinapsis Corp involves problem identification and resolution on the platform, development and implementation of new features and improvements, continuous exploration of the latest technological trends, active and effective collaboration with diverse teams and functional areas, and the application of agile methodologies for efficient development management.

Collaborations
FreeCodeCamp
December 2023 - Present
I participate in the translation of educational content from English to Spanish. This role has provided me with a unique perspective on best practices in localization and translation techniques in such an important project as FreeCodeCamp.

Surco Tenis: Collaborative project where I was responsible for reservation logic and payment gateway. This solution is built with Node.js, Express, and MySQL: https://reservas.surcotenis.pe/

Expense Control: Personal project developed with React, Redux, Node.js, Express, and MongoDB. The purpose is to control expenses in three steps: create a plan, register a user, and enter daily expenses: https://joseyzambranov.github.io/expense-control/

Education:
Instituto Universitario de Tecnologia de Administracion Industrial
Degree Obtained: Superior Technical in Instrumentation.

Universidad Nacional Abierta (UNA)
Systems Engineer: Up to the second semester.
